

SPRINT-I

SETTING UP APPLICATION ENVIRONMENT

Install IBM Cloud CLI:

Over here after created account in the IBM cloud there are some tutorials in the dashboard. Over there, get started with CLI tutorial will appear using the documentation we'll install the IBM cloud CLI.

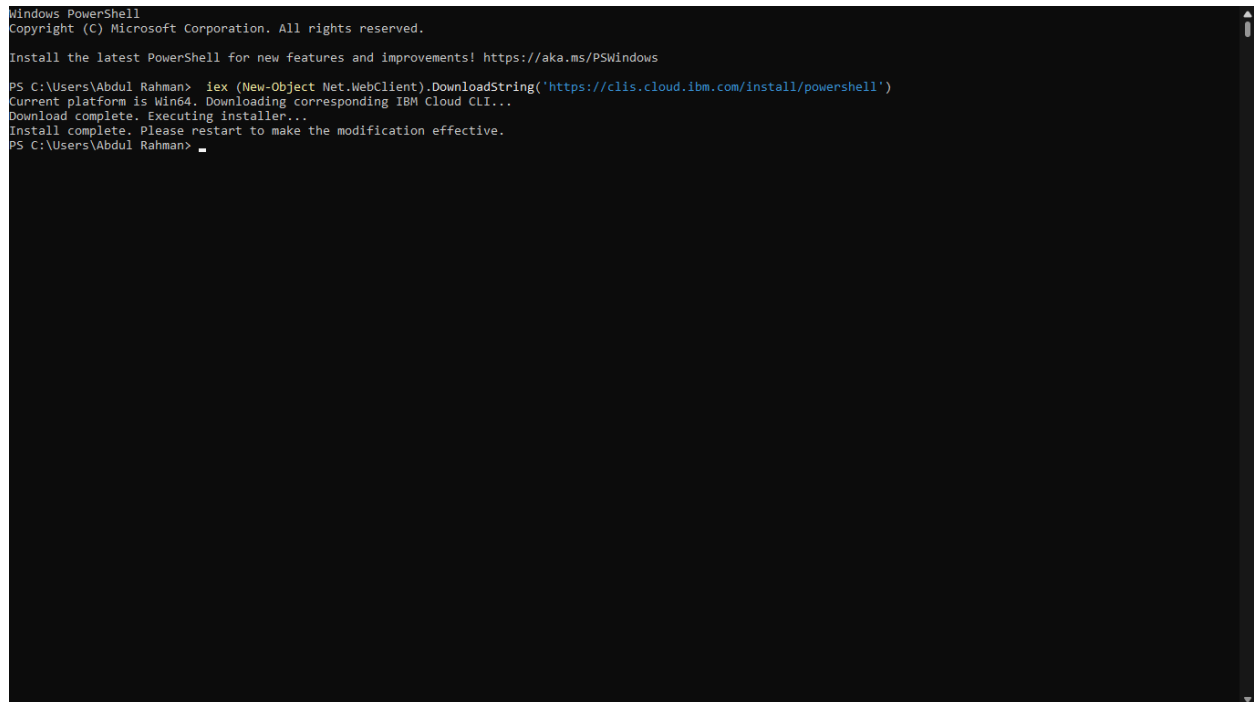

After clicking that tutorial, the instruction documentation page will open using those instructions to install IBM cloud CLI and also install some plugin-tools with the CLI for the work purpose while developing and deploying the Application.

Use the following Command to Install the IBM Cloud CLI:

```
iex (New-Object Net.WebClient).DownloadString('https://clis.cloud.ibm.com/install/powershell')
```

After Installed IBM cloud CLI the PowerShell screenshot shown below:

A screenshot of a Windows PowerShell terminal window. The window title is "Windows PowerShell" and it includes a copyright notice for Microsoft Corporation. The terminal shows a message to install the latest PowerShell version. The user enters a command to download the IBM Cloud CLI installer from a specific URL. The terminal output shows the download progress, completion, and a final instruction to restart the system for the changes to take effect. The prompt shows the user is in the C:\Users\Abdul Rahman directory.
